

I-VI/06

1st Half-Year Report 2006

- Best ever half-year results
- High capacity utilization
- Price increase for cartonboard and folding cartons gradually implemented
- Further increase of crude oil related costs necessitates another price rise
- Stability of demand in the 3rd Quarter

Group Report

Dear Shareholders,

As expected, your Company could take the positive momentum also into the second quarter. Thus, the first half of 2006 could be finalized with the so far best ever half-year results.

Increasing economic dynamics in the major Western European economies and a noticeable pick-up in private consumption contributed to healthy demand for our products. However, the persistence of this positive sentiment in our core markets remains difficult to assess.

Against this background MM Karton as well as MM Packaging registered a consistently sound utilization of capacities and a positive development of earnings.

MM Packaging again benefited from improved productivity. In the cartonboard division the price increase necessitated by the drastic surge of all crude oil related costs has been gradually implemented since the beginning of the year. In this connection, taking temporary downtime at our Bulgarian mill has proven to be the right support. Margins of this segment could be improved step by step in the course of this year.

Statement of Income

Consolidated sales increased by EUR 15.7 million or 2.2 % to EUR 731.1 million. This increase resulted from the cartonboard segment which achieved an evident improvement in volume as well as in prices compared to the previous year.

The operating profit was enhanced by 12.6 % from EUR 70.6 million to EUR 79.5 million, which is largely contributable to the earnings increase at MM Packaging. The rise in other operating income from EUR 6.2 million to EUR 8.2 million mainly resulted from the divestment of the real estate of the Hungarian folding carton plant closed at the end of 2005. The operating margin of the Group came up to 10.9 % (1st half of 2005: 9.9 %).

Financial expenses stood at EUR 3.0 million while financial income amounted to EUR 3.9 million.

Profit before tax reached EUR 79.0 million (1st half of 2005: EUR 73.0 million). This is equivalent to a rise of 8.2 %. The Group's tax rate declined from 32.5 % to 31.0 %. Income tax expense amounted to EUR 24.5 million (1st half of 2005: EUR 23.7 million).

The profit for the period reached a new record level of EUR 54.5 million with a rise of 10.5 %.

Assets, Capital, Resources, Liquidity

The Group's balance sheet total increased by EUR 54.3 million to EUR 1,400.7 million compared to year-end 2005. This rise on the one hand resulted from a growth in equity from EUR 769.7 million to EUR 784.2 million, attributable to the profit for the period less the 2005 dividend. On the other hand, financial liabilities were raised at favorable interest rates for financing major investments in the rotogravure area as well as the acquisition of shareholdings.

Financial liabilities moved up by EUR 36.2 million to EUR 222.4 million (December 31, 2005: EUR 186.2 million). Total funds available to the Group amounted to EUR 337.6 million after EUR 338.1 million at year-end 2005. The Group therefore continues to have no net debt.

Non-current assets were up EUR 34.4 million reaching EUR 717.2 million. Intangible assets amounted to EUR 39.7 million (December 31, 2005: EUR 36.5 million), of which EUR 36.2 million (December 31, 2005: EUR 31.7 million) accounted for goodwill. Current assets increased by EUR 19.9 million to EUR 683.5 million.

Cash Flow Development

Cash flow from operating activities totaled EUR 71.3 million. The difference to EUR 48.4 million of the first half of the previous year can be particularly contributed to the working capital increase in that period following the resumption of production at the Eerbeek board mill after a fire damage.

Cash flow from investing activities amounted to EUR -81.2 million (1st half of 2005: EUR -43.3 million). This rise mainly resulted from increased investment activities connected with the construction of the new rotogravure sites in Cherkassy (Ukraine), Izmir (Turkey), and Trier (Germany). Net expenditures on investments in tangible and intangible fixed assets totaled EUR -46.1 million (1st half of 2005: EUR -39.9 million). Net payments for acquisitions amounted to EUR -37.8 million (1st half of 2005: EUR -6.9 million).

Cash flow from financing activities was at EUR +10.8 million after EUR -48.2 million in the previous year's period. A net inflow of funds resulting from financial liabilities raised at favorable interest rates faced an outflow of funds related to the dividend payment.

Development in the Second Quarter

As expected, also the second quarter was characterized by ongoing healthy demand for cartonboard and folding cartons. At 92 % capacity utilization of MM Karton was below the first quarter due to the installation of a new yankee cylinder at the Eerbeek board mill (Q1 2006: 94 %, Q1 2005: 93 %, Q2 2005: 94 %).

Procurement markets again stood in the light of a significant price increase of all crude oil related input factors. In line with the overall demand situation also prices for recovered paper saw a slight upward trend. Hence, MM Karton announced a further price increase for the beginning of the second half-year. Due to the regional sales split, average sales prices were slightly below the first quarter.

MM Packaging succeeded in maintaining a high yield in its business as productivity enhancing programs were consistently pursued. Resulting from the discontinuation of a trading business, divisional sales come in below the previous year's level.

Group operating profit amounted to EUR 39.4 million after EUR 40.1 million in the first quarter of 2006 (Q2 2005: EUR 34.2 million). The profit for the period reached EUR 27.1 million (Q1 2006: EUR 27.4 million, Q2 2005: EUR 24.0 million).

Further Information

As of January 1, 2006, MM Packaging acquired the remaining minority interest of 33 % in Ernst Schausberger & Co. Gesellschaft m.b.H. located in Gunskirchen, Austria, and is now the sole owner of the company.

In May 2006, MM Packaging acquired a majority interest in a joint venture with TEC S.A., a leading Tunisian packaging producer.

Outlook

Facing the ongoing positive development of demand in both of the Group's segments, a continuous high level of capacity utilization can also be expected for the third quarter. Due to the significant rise in all crude oil related costs, a further cartonboard price increase is being pursued since mid-year. This would however not offset any future pressure from additional energy costs based on most recent indicators. For support, temporary downtime will be maintained at the Bulgarian mill MM Nikopol until the end of the third quarter. In the packaging division focus is set on steadily passing on the cartonboard price increases. Expenses connected with the start-up of production at the three newly built rotogravure sites are expected to have an increasing impact.

Programs for cost optimization and productivity improvement will be continued on a broad basis with great effort, as the current bright spot in the economy might be of short-term nature.

We maintain our target to grow by new production sites and acquisitions.

Report on the Divisions

Mayr-Melnhof Karton

Against the background of the upswing in the large Western European economies MM Karton registered an overall positive development of demand during the first half-year of 2006. This supports the implementation of the necessary price increase following the continuous rise in costs, especially of energy and all crude oil price related input factors. The decision for temporary downtime at the Bulgarian site MM Nikopol proved to be of value in supporting our price increase efforts. According to schedule a new yankee cylinder was installed at the Dutch mill MM Eerbeek after an insured damage in the previous year. However, due to the excellent production performance of the other mills the previous year's output was topped by 1.3 % with the tonnage produced reaching 772,000 tons. In line with the mentioned downtime available capacities were utilized at approximately 93 % (1st half of 2005: 94 %).

The average order backlog leveled at approximately 83,000 tons after around 59,000 tons in the first half of 2005. At 768,000 tons, cartonboard sales increased by 3.2 % compared to the previous year's level (744,000 tons). Hereof, Europe accounted for approximately 79 % and non-European markets for 21 % (1st half of 2005: 78 %, 22 %).

Based on increased average prices and a higher volume dispatched, sales came up by 6.5 % to EUR 400.3 million. Operating profit could be improved from EUR 33.4 million to EUR 34.0 million. The operating margin consequently amounted to 8.5 % (1st half of 2005: 8.9 %).

Divisional Indicators MM Karton (in accordance with IFRS, unaudited)

Operating margin (%)	8.5 %	8.9 %	
Tonnage produced (in thousands of tons)	772	762	+1.3 %

¹⁾ including interdivisional sales

Mayr-Melnhof Packaging

The European folding carton market faced a friendly development in demand during the first half of 2006. However, ongoing concentration on the part of international consumer goods producers and existing overcapacities in the manufacture of folding cartons kept competition unrelievedly sharp.

Under these circumstances MM Packaging succeeded in continuing its course of expansion in earnings and volume based on a continuous increase of productivity and an effective cooperation with strategic key customers.

Operating profit could be significantly improved by 22.3 % to EUR 45.5 million. At EUR 389.4 million sales came below the level of the first half of 2005 (EUR 397.4 million) due to the permanent discontinuation of a trading business. The operating margin however moved up from 9.4 % to 11.7 %. The tonnage converted was increased by 7,000 tons (+2.8 %) to 257,000 tons.

Operating margin (%)	11.7 %	9.4 %	
Tonnage processed (in thousands of tons)	257	250	+2.8 %

¹⁾ including interdivisional sales

Positive development of the rotogravure-investments

The initial order intake for the newly constructed rotogravure plants in Trier (Germany), Cherkassy (Ukraine), and Izmir (Turkey) is promising and already indicates a good capacity utilization of the new machinery in the coming year.

Start of expansion in North Africa

With the acquisition of a majority interest in TEC MMP S.A.R.L. located at Sfax, Tunisia, MM Packaging has started its expansion in the emerging region of North Africa. Still in 2006, a second packaging plant is scheduled to start operations in Tunisia.

Set-up of a dedicated facility for detergent packaging at St. Petersburg

In consistency with the strong growth of international detergent producers on the Russian market, MM Packaging will transform its MM Packaging St. Petersburg offset-facility, which was acquired in 2004, into a highly modern plant for detergent packaging.
