Group Report

DEAR SHAREHOLDERS,

In the first quarter of 2014 your Company recorded an overall solid business performance, though there were still no impulses from the economy as a whole, in particular from private consumption. However, due to improvements in prices and the product mix of cartonboard production as well as a slight increase in volumes in both divisions an overall healthy growth in sales and profit could be reached compared with the same period of the previous year. Our expansion course continued in line with strategy and the newly constructed fourth folding carton site in Turkey was put into operation.

A current look forward does not indicate any significant changes in the development of sales and procurement markets, either. Demand in our customer industries remains continuous, customer planning however still short-term. Under these overall circumstances our objective remains to secure the price structure for our products in a highly competitive environment as best as possible and to further increase our market shares in both mature as well as growth markets.

INCOME STATEMENT

At EUR 523.9 million the Group's consolidated sales exceeded the previous year's value (1Q 2013: EUR 496.7 million) by 5.5 %. This is primarily due to improved average prices at MM Karton as well as an increase in volumes in both divisions.

Consolidated sales by destination (according to IFRS for interim financial reporting, unaudited)

(in %)	1 st Quarter	
	Jan. 1 - Mar. 31, 2014	Jan. 1 - Mar. 31, 2013
Western Europe	58.6 %	60.5 %
Eastern Europe	26.0 %	25.9 %
Asia	6.0 %	4.3 %
Latin America	5.1 %	5.2 %
Other	4.3 %	4.1 %
Total	100.0 %	100.0 %

Operating profit rose by 20.3 % or EUR 7.8 million to EUR 46.2 million. This growth results to a large degree from the Cartonboard Division, which recorded non-recurring rebuild-related expenses in the comparative period of the previous year. Accordingly the Group achieved an operating margin of 8.8 % (1Q 2013: 7.7 %).

Financial income of EUR 0.4 million (1Q 2013: EUR 0.3 million) was offset by financial expenses of EUR -1.3 million (1Q 2013: EUR -0.9 million).

Profit before tax thus increased by 19.6 % to EUR 43.3 million (1Q 2013: EUR 36.2 million). Income tax expense was at EUR 11.2 million (1Q 2013: EUR 9.2 million), resulting in an effective Group tax rate of 25.9 % (1Q 2013: 25.4 %).

Therefore the profit for the period went up by 18.9 % to EUR 32.1 million (1Q 2013: EUR 27.0 million). This corresponds to 6.1 % of sales (1Q 2013: 5.4 %). In the first quarter of 2014 a basic weighted average of 20,000,000 shares was outstanding, resulting into earnings per share of EUR 1.59 (1Q 2013: EUR 1.35).

ASSETS, CAPITAL AND LIQUID FUNDS

As of March 31, 2014, the Group's total assets amounted to EUR 1,744.4 million and were thus EUR 41.9 million higher than the comparative figure of the previous year (December 31, 2013: EUR 1,702.5 million). This increase is primarily the result of a profit-related rise in equity from EUR 1,111.8 million to EUR 1,127.7 million as well as of a rise in working capital due to increased operating activities.

At EUR 172.5 million, financial liabilities, principally of a long-term character, remained broadly unchanged compared to year-end 2013 (December 31, 2013: EUR 169.6 million). Total funds available to the Group increased slightly from EUR 303.5 million as of December 31, 2013 to EUR 317.3 million, with a rise in net liquidity to EUR 144.8 million (December 31, 2013: EUR 133.9 million).

Current assets went up by EUR 47.2 million to EUR 958.4 million mainly due to increased operating activities compared to year-end 2013.

CASH FLOW DEVELOPMENT

Cash flow from operating activities reached EUR 44.0 million and was thus EUR 12.9 million above the comparative value of the previous year (1Q 2013: EUR 31.1 million). This difference is primarily due to the increase in profit and lower income tax payments.

Cash flow from investing activities amounted to EUR -31.6 million after EUR -24.9 million in the first quarter of the previous year. This rise is mostly attributable to higher expenditures for the acquisition of property, plant and equipment. Investments focused on the larger one of the both cartonboard machines (KM 3) at the Frohnleiten board mill, capacity expansion in the recently constructed folding carton plants in Bydgoszcz, Poland, and Karaman, Turkey, as well as on technical modernization and expansion.

Cash flow from financing activities changed from EUR -1.2 million to EUR 1.7 million.

FURTHER INFORMATION

In November 2013, the division MM Packaging entered into an agreement to acquire three A&R Carton sites, St. Petersburg, Timashevsk, Southern Russia, and Augsburg, Germany, which could not be closed due to changed circumstances.

OUTLOOK

Continuity and a calm market development should determine demand also over the coming months. The aim of MM still remains to grow in the European main market as well as in the future markets outside of Europe in order to maintain the profitability of the business at a high level. Accordingly we will continue to focus on a high level of efficiency and technology leadership in production as well as on expanding capacities in growth markets. The highlight of our investments this year is a large-scale investment of around EUR 50 million in the Austrian Frohnleiten main mill for FOODBOARD™, an innovative cartonboard that guarantees optimum protection for food. The implementation focus is planned for the fourth quarter.

DIVISIONS

DIVISIONS

MM Karton

The cartonboard market was still characterized by cautious customer planning and broad stability across all types and sales regions in the first three months of 2014. The average order backlog of MM Karton was around 60,000 tons (1Q 2013: 93,000 tons), which documents the short-term visibility. However, due to a high degree of flexibility in planning the cartonboard machine program and an attractive range of products, a capacity utilization of around 97 % (1Q 2013: 98 %) could still be achieved for the division in the first quarter.

Analogously to the sales markets, the development on the procurement markets, especially for the strategic input materials recovered paper and energy, remained sustainably stable.

Production increased by 2.6 % to 401,000 tons (1Q 2013: 391,000 tons). At 408,000 tons, the tonnage sold was above production as well as above the previous year (1Q 2013: 404,000 tons). Of this, 83 % was sold in Europe and 17 % in non-European markets (1Q 2013: 82 %; 18 %).

Sales rose by 9.2 % to EUR 259.4 million (1Q 2013: EUR 237.6 million) primarily as a result of improved average prices and an optimized product mix. In accordance with this and also due to the shortfall of rebuild and downtime costs from the comparative period of the previous year, operating profit reached EUR 18.8 million after EUR 11.3 million in the first quarter of 2013. The operating margin was therefore 7.2 % (1Q 2013: 4.8 %).

MM Packaging

Our folding carton plants were also able to start 2014 with an overall stable order situation. In parallel to the development of private consumption, demand on the European folding carton market still remained restrained. There is a lack of positive market impulses, which is the reason for the unabated ongoing of the intensified price competition among market players. Against this background, MM Packaging was again able to maintain its position in the first three months of the year due to a high level of efficiency in production and further volume growth, however with an increasing heterogeneity in capacity utilization among the plants.

The newly built fourth folding carton site in Turkey, in Gaziantep, was put into operation on schedule. The technological focus of the plant is on the production of packaging for consumer goods, in particular food, using offset printing.

At EUR 290.4 million, sales were slightly above the value of the previous year (1Q 2013: EUR 285.6 million). Operating profit developed similarly from EUR 27.1 million to EUR 27.4 million, with the operating margin remaining constant at 9.4 % (1Q 2013: 9.5 %).

The tonnage processed increased by 6.0 % from 168,000 tons to 178,000 tons, the sheet equivalent by 7.8 % from 465.7 million to 501.8 million.

5 — FINANCIAL INSTRUMENTS

Financial instruments comprise financial assets and financial liabilities and are recognized in different categories, which determine the subsequent measurement method and thus also the resulting type of income and expense.

The financial assets of the Group consist of securities, other financial assets, loans, trade receivables, other receivables and investments (except for certain positions which do not represent financial instruments, such as receivables regarding taxes and other charges), cash and cash equivalents as well as derivative financial instruments with a positive balance.

Financial liabilities of the Group comprise interest-bearing financial liabilities, trade liabilities, other liabilities (except for certain positions, which do not represent financial instruments, such as liabilities regarding taxes and other charges) as well as derivative financial instruments with a negative balance.

The financial assets and financial liabilities are measured either at fair value or at amortized cost.

a — Measurement at fair value

The amounts of financial assets and financial liabilities, which were recognized at their fair value, are as follows:

	Level 2	
	End of 1 st Quarter	Year-end
	Mar. 31, 2014	Dec. 31, 2013
(all amounts in thousands of EUR)		
Financial assets:		
Derivative financial instruments	254	571
Financial liabilities:		
Derivative financial instruments	675	958

Measurement methods

Depending on the availability of market price information, the Group uses the following hierarchy for the determination of the measurement method and presentation of fair values of financial instruments:

Availability of information, broken down by levels	Measurement method used
Level 2 – Quoted market prices for identical instruments are not available but all required measurement parameters can be derived from active markets	Measurement based on valuation methods by applying directly or indirectly observable market data

The disclosed fair values of foreign currency forward contracts (level 2 measurement) are measured according to the spot rates at the balance sheet date considering forward premiums and discounts with corresponding maturities.

In general there are also financial instruments measured at fair value based on the prices quoted on active markets (level 1 measurement) or using parameters for which no observable market data exists (level 3 measurement). Currently there are no such financial instruments in the Mayr-Melnhof Group, for which these measurement methods would be applicable.

b — Measurement at amortized costs

The amounts of trade receivables, securities measured at amortized cost, cash and cash equivalents, share purchase price and option liabilities and other financial liabilities disclosed in the consolidated balance sheet represent an appropriate approximate value of the fair value.

The available-for-sale financial assets include equity shares in non-consolidated companies as of March 31, 2014 in amount of thous. EUR 1,797 (December 31, 2013: thous. EUR 1,769). There is no active market for these equity shares. As in this regard the future cash flows cannot be reliably measured, a market value cannot be determined by valuation models. The equity shares in these companies are therefore reported at acquisition cost. There is no intention to sell these equity shares, no derecognition or valuation results were recorded.

6 — INVENTORIES

In the first quarter of 2014 the write-downs of inventories recognized as an expense under costs of goods sold amounted to thous. EUR 5,984 (1Q 2013: thous. EUR 3,773), the reversal of write-downs of inventories recognized as income amounted to thous. EUR 16 (1Q 2013: thous. EUR 10).
